

Security Patrol

Robotics solutions

PATROL / OBSERVE / VERIFY / RESPOND

Extend patrol coverage.
Reduce personnel exposure.

Mobile patrols for industrial campuses, logistics yards and site perimeters. Add visibility where fixed cameras cannot reach.

Warpify matches robot platforms and payloads to your routes, terrain and operating needs, with integration, deployment, training and support.

01

Cover your priority areas

Automate scheduled rounds at gates, doors and perimeter checkpoints, with a record of completed checks.

02

Verify alerts on demand

Send a robot to inspect blind spots or flagged events and return live video with time and location.

03

Assess risk remotely

Use live video and selected sensors to assess potentially hazardous conditions remotely. Operators decide when and how to respond.

Sensing matched to the task

Visible + thermal

Day / night observation and remote hotspot checks.

Add two-way audio, lighting, gas or acoustic sensing. Payloads and analytics are selected for your patrol tasks, site conditions and operating limits.

PATROL CONTINUITY

Recharge for the next round.

Automatic docking and recharging are planned into your patrol schedule.

See beyond fixed cameras.

Illustrative interface

Fixed CCTV flags activity. A robot checks the blind spot. Your team decides the response.

SYSTEM CAPABILITIES

01 Patrol operations

Mission planning	Autonomous routes; scheduled & on-demand patrols
Mission status	Progress, checkpoints & missed-check alerts
Human response	Review, escalation & handover
Task continuity	Obstacle avoidance, safe stop & recovery

03 Control + connectivity

Remote operation	Live video, remote driving & authorised takeover
Network options	Wi-Fi / 4G / 5G; buffering & reconnect
System integration	CCTV / VMS, access control & incident systems
Data management	Cloud / on-premises; access, retention & encryption

Direct purchase

Own your system, with commissioning, software, warranty and support scoped in your proposal.

Start with a site assessment.

Define routes, site risks, integrations and trial measures.

Configured around your site, risks and existing systems.

02 Patrol sensing

Visible sensing	PTZ, panoramic & low-light cameras
Thermal sensing	Remote hotspot & temperature checks
Audio + lighting	Two-way audio, broadcasts & lights
Environment	Selected gas & dust monitoring
Acoustic	Abnormal sound detection

04 Analytics + software

Event detection	Intrusion, loitering & parking, fire exceptions
Site checks	Door / gate status & thermal anomalies
Evidence	Video, images, time & location
Patrol reporting	Completed / missed checks; activity & incident logs

Security Patrol as a Service

Equipment, software and maintenance as a service. Monitoring and response support matched to your scope.
